

## **Information for Draft Map**

The draft map in this file has been created for you by this office using the official census data and your current precinct structure. If you would like technical assistance from this office in creating a final map, please select "Option A" as described in the Data Release Packet. If you are proceeding with "Option B," your municipality is entirely responsible for creating an official map and other required materials without the assistance from our office.

Please review this map and contact our office via the email link in your Data Release Packet with any **revisions** or to request a consultation. Revisions are best organized by emailing us with explicit instructions with regards to your map.

Upon receiving your revision request in writing, we will incorporate the changes and provide you with an updated map. After all revisions have been made, your final map will be included in your "Final File Cabinet" which will be sent to you in a separate email. Upon receiving your final map, it should be reviewed and should be voted on and adopted by your municipality, along with the other required materials provided to you.

After local approval, the final approved map and required paperwork must be submitted to the LEDRC at the mailing address included in the Data Release Packet. This office will present your submission to the LEDRC on your behalf.

**Commented [TM(1):** Should we add in how they should request the revisions? Like move blocks between this street and that street to precinct 3.
